To Whom It May Concern:

Subject: MSDS for Inserta Tee's

According to OSHA regulations 1919.1200 (c), the products in question is classified as an article. The product does not release or emit hazardous substances and exposure does not present a health problem.

Therefore, we have been advised by OSHA that this letter should suffice in lieu of a Material Data Sheet. We are including a copy of the MSDS for the soap solution that is used to lubricate the fitting during installation.

Please let us know if you have any further questions.

Regards

Jim Ficker  
Inserta Fittings Company
